Sustainability and Super Pandemics: The Connection

By Dr. Igor Shepherd

September 16, 2021

Sustainability. What the heck is this and what does it have to do with super pandemics? The "Kool-Aid" version of sustainability is defined as a way for people to use resources without the resources running out—but the actual blueprint behind it is to subvert current governments for global takeover. Sustainability is already deeply entrenched in all governments, world health organizations, military, universities, corporations, and the pharmaceutical goliaths rolling out the mRNA weaponized vaccines. Through sustainability, super pandemics become one nasty way with which to transform the world.

In the 1980's, *Agenda 21* emerged on the scene, and began to circulate among American thinkers, and cause a stir. *Agenda 21* was a United Nation's-founded "communist" scheme to globalize world governments by the year 2021, under the guise of "saving the environment." The marketing campaign that our earth needed saving was the means with which the founders hoped to revamp the world's governments under one stringent global umbrella. The premeditated "coup d'état" was out there in plain sight, but the globalists employed effective propaganda to convince the majority of people that *Agenda 21* was all about the environment, and nothing more. The foolery worked, and the majority of Americans ignored the visible signs of infiltration.

To continue keeping this "freedom-flattening" plot under wraps, the globalists shifted gears, and labeled *Agenda 21* under a softer tag, calling it *Sustainable Development*. *Sustainable Development* (SD) is code word for communism. It became popular in 1987, after a report titled, *Our Common Future*, was circulated under the direction of Gro Brundtland, who endorsed communism, and was vice president for Socialist International. She had previously worked as director for the World Health Organization. One of her most notable quotes provides clues that a planned emergency was on the books to usher in global change. She stated:

"*In the face of an absolutely unprecedented emergency, society has no choice but to take dramatic action to avert a collapse of civilization. Either we will change our ways and build an entirely new kind of global society, or they will be changed for us."*

Five years later, in 1992, at the UN's *Earth Summit* meeting, Secretary-General Maurice Strong, a shady Canadian communist who resided in China, distributed a report entitled *Agenda 21*, which effectively established a worldwide network promoting a one world government. President Bush (senior) betrayed Americans, and along with 177 other world leaders, signed onto the UN's *Agenda 21*. The global "germ" spread, and President Clinton signed executive order 12852 to execute the document titled, "President's Council of Sustainable Development." Both Obama and Trump, during their presidencies, further caged SD goals into American government, and whitehouse.gov documents (like USAID) openly supported sustainability.

Are you starting to get the big picture? This pandemic has nothing at all to do with protecting the masses from infection. Covid-19 is a devised plan of psychological warfare against the global population to induce fear and prepare the way for a new world order. Through *Sustainable Development*, American leaders have sold out America and aligned this nation with communist principles. The runaway muscle power we are witnessing today has breached civil rights and American law, and citizens should be zealously banding together in mass defiance against the treason, vehemently refusing to be locked up, masked up, and forced to take vaccinations that are already proven to be lethal weapons of mass destruction.

By 2015, it was evident *Agenda 2021* would miss its deadline for global governance, and the timeframe was extended and repackaged under *Agenda 2030*. Let me unmask this subterfuge with some disturbing facts. A major goal for this agenda is depopulation. Under communism, the less people, the easier to control the populace. This is why China and Russia have a history of genocide on their own citizens. This is why China put in place a two-child policy and why US presidents fund abortion clinics with a kill-rate of approximately 360,000 babies a year. And since Bill Gates and the World Health Organization were caught hiding hormones in tetanus shots in Africa and the Philippines, causing women to miscarry and become sterile, we should be highly suspicious of the "secret" patented Covid-19 vaccines. Murder is justifiable sport under all those vaccine companies who are part of *Sustainable Development*.

*Agenda 2030'*s objectives reveal a cashless society, seizure of all private property and businesses, removal of all individual freedoms, advanced surveillance and technology, and isolation of humanity. Semi-annual inoculations will be the world's "gift" for human DNA transformation. The age of technocracy will dominate everything, and man becomes machine through various methods of interference within the physical body, human mind and human genome. It is no wonder Moderna's CEO stated that mRNA technology in their vaccines were the "software" of life.

Given the mRNA inherent "programmability" of the Covid-19 vaccines, patterned after Soviet-style bioweaponry, where DNA segments from two or more artificial DNA molecules are inserted into the cell's nucleus, and altered to produce newly "manmade" genetic combinations, a full capability to change human behavior, create non-genders, and eliminate races and whole populations is a real possibility for population control. If these bio-vaccines were designed to be used for offensive bioweapon application onto an unsuspecting public for genocide (the large amount of Covid vaccine deaths reported so far provide credence to this question), would creating dangerous proteins by fusing artificial genetic materials into the nucleus of healthy human cells be the only scheme crafted for controlled genocide? No, absolutely not.

There are more plots brewing by the globalists, you can count on it. But there is one carefully-crafted scheme that fills-in-the-blanks on why our leaders are ignoring natural herd immunity, telling us it does not work for SARS-CoV-2, and forcing mRNA vaccines, masks, lockdowns, and distancing measures. Their actions to weaken the immune systems of the global public indicate a plethora of "real" super pandemics planned ahead. Through this strategy, they could put the fake Covid pandemic to rest,

and successfully kill billions of people this time around, enabling the heads of *Agenda 2030* to forcibly detain anyone who is not vaccinated. CDC has already designated "green zone" locations to isolate high-risk individuals (non-vaccinated). Green zones are simply cryptogram for confinement camps.

What is herd immunity and why is it important in fighting infections naturally? Herd immunity is like a spontaneous memory within the immune system, in the form of antibodies which protect and trigger proper immune response against a familiar virus. It is our bodies natural way to fight diseases through previous exposures to infections, and occurs when a large portion of the public, or the "herd," has been exposed and becomes immune to the disease. This is a normal cycle of human life, and why outbreaks and pandemics eventually vanish. Traditional vaccines (not mRNA vaccines) that carry live viruses can also produce positive memory in the body against specific viruses, and be part of creating a positive herd immunity.

Covid-19 pharmaceutical companies, with strong collaboration of governments, are now gearing up for the "communist-style" mandated semi-annual booster shots to protect us all from their illusory SARS-CoV-2 variants. The madmen in power throw out the excuse that boosters are necessary because titers (amounts of antibodies found in a person's blood) weaken after a certain time, and lose memory with which to protect the body against the virus. The reality is that every time an mRNA shot is administered, the body's immune system becomes hostage to a "modified" protein. In other words, through gene-editing, the mRNA vaccine tricks the body's natural immune functions and "reprograms" it to work artificially, removing the body's own natural instinctive job of releasing antibodies. Continual injections of Covid vaccinations and boosters hamper proper immune system response, leading the way for whole populations to be rendered impotent in fighting off simple viral diseases, like seasonal flu.

Since the body is no longer able to naturally fight a mild bug like the flu, the virus kicks into high-gear, spreading at high-speed from person to person, causing an uncontrollable super pandemic to emerge. The concentration of a multiplied virus will be elevated so high that the vaccinated persons will take on the role of super-spreaders, generating horrendous outbreaks. The super-spreaders become like heroin addicts, seeking more and more shots to counter their own afflictions, but the vaccinations offer no relief. The outcome brings about extreme susceptibility to different antigens, excessive mortality rates, and no treatment. And since the mRNA vaccines will be stripping most of the vaccinated populace from the natural response of herd immunity, this will change the way diseases spread, and pave the way for an "*entirely new kind of global society*."

Manmade pathogens might not be off the table during these times of super pandemics. Any enemy can swoop in and disperse the mildest of bioweapons to hasten major kill-offs in certain areas. There is a phenomenon during bioweapon aerosol release called the "fanning" effect. This occurs when the population inhales high concentrations of manmade pathogens during dispersion, bringing about swift destruction of life. For instance, Moderna, who is partnered with Biomedical Advanced Research & Development Authority (BARDA), is currently working on developing mRNA vaccines for two types of Avian flu, A(H7N9) and A(H5) (which is odd because

mRNA vaccines for two types of Avian flu, A(H7N9) and A(H5), (which is odd because the Avian flu is contained and no longer a current threat). This bird flu would make a wise choice for a bio-release or to create a super pandemic because of the probability for excessive deaths. Avian flu outbreak happened in China between 2013 and 2017, and though the infection rate was minimal, fatality rates were staggeringly high within that small number, up to 40%. Imagine the loss of life if dispersed in a major city. Guess we should not worry, Moderna would save the day with oodles of more mRNA vaccines.

In 2020, at the onset of Covid, the media began to spin *Sustainable Development* as the only means with which to live in a "post" Covid-19 world. But in order to improve indoctrination and keep the people from connecting the dots that an enemy takeover was underway, Klaus Schwab, CEO of the World Economic Forum, took the lead in birthing *The Great Reset*. *The Great Reset* mirrors Brundtland's sustainable development goals from 1987. Schwab quickly published his book, *The Great Reset*, to announce the disruptions caused by Covid-19, and the new changes needed to create a more inclusive, resilient and sustainable (communist) world going forward.

Time magazine advertised Schwab's new book in two issues, back-to-back, heralding the author for providing the world with "a unique opportunity to change our future and transform the way we live and work." *Time's* true allegiance to communism is nothing new. Stalin was put on their cover 11 times, the first issue in 1943, where he was hailed as "Man of the Year," after he had already murdered 1.2 million people.

The United Nation's document entitled, *Transforming our World: The 2030 Agenda for Sustainable Development*, supports Schwab's "reset" with this statement: *We reaffirm our unwavering commitment to achieving this Agenda and utilizing it to the full to transform our world for the better by 2030.*

Agenda 2021, *Agenda 2030*, *Sustainable Development* and the *Great Reset* are all one and the same, and why in 2019, a new pandemic emerged onto the scene from China (remember Agenda 21/SD was conceived with China's fingerprints all over it). The world's population was pulled into lockdowns, and once-free nations discarded decades of medical protocol to pattern their emergency measures after China's heavy-handed response style. Herd immunity became anomalous, civil liberties were snubbed, and the "gestapos" in power implemented warfare psychology onto the masses to convince them to submit to forced home arrest, mask-wearing and mandated vaccinations.

Professor Chris Beyrer, an epidemiologist at the John Hopkins Bloomberg School of Public Health, made a disturbing quote in an online article by Fast Company back on 11-09-20 (shortly before the vaccines were dispersed). It was titled: "How Pfizer and Moderna's Covid-19 Vaccines Work." Beyrer summed up why the mRNA vaccines would be harmful to billions of people. His quote states:
"*There are a few realities that I think you have to acknowledge. The first is that there have been many attempts to use this technology in this mRNA and platform for vaccines for other diseases, and none of them have made it to licensure. So, this is an unproven technology at this point."*
Wow, and after this admission of gross failure, and the many deaths so far, the vaccine makers are still plunging ahead to swap traditional seasonal and pandemic flu

vaccine makers are still plunging ahead to swap traditional seasonal and pandemic flu platforms with mRNA technology.

Covid-19 vaccines were never intended as a preventive prophylactic against a new coronavirus, but rather for deliberate warfare against the masses to bring about a new global regime. Once the world population begins to shrink from the bio-vaccines and super pandemics, which I predict will begin to occur in a few short years, those remaining will have little recourse to fight back or resist the new global rule and constant genetic engineering reshaping their bodies and minds from the relentless jabs. Do you get the big picture now? I hope so because time is short and America is falling fast.
